THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2017/625 of the European Parliament and of the Council of 15 March 2017 on official controls and other official activities performed to ensure the application of food and feed law, rules on animal health and welfare, plant health and plant protection products, amending Regulations (EC) No 999/2001, (EC) No 396/2005, (EC) No 1069/2009, (EC) No 1107/2009, (EU) No 1151/2012, (EU) No 652/2014, (EU) 2016/429 and (EU) 2016/2031 of the European Parliament and of the Council, Council Regulations (EC) No 1/2005 and (EC) No 1099/2009 and Council Directives 98/58/EC, 1999/74/EC, 2007/43/EC, 2008/119/EC and 2008/120/EC, and repealing Regulations (EC) No 854/2004 and (EC) No 882/2004 of the European Parliament and of the Council, Council Directives 89/608/EEC, 89/662/EEC, 90/425/EEC, 91/496/EEC, 96/23/EC, 96/93/EC and 97/78/EC and Council Decision 92/438/EEC (Official Controls Regulation) <sup>(1)</sup>, and in particular Article 47(2), first subparagraph, point (a), thereof,

Whereas:

- (1) Commission Implementing Regulation (EU) 2021/632 <sup>(2)</sup> establishes lists of animals, products of animal origin, germinal products, animal by-products and derived products, composite products, and hay and straw to be presented for official controls at border control posts, with the indication of their respective Combined Nomenclature codes ('CN codes') provided for in Council Regulation (EEC) No 2658/87 <sup>(3)</sup>.
- (2) Articles 3, 5 and 12 of Commission Delegated Regulation (EU) 2019/625 <sup>(4)</sup> provide for import requirements for consignments of goods referred to by certain CN codes and Harmonised System codes ('HS codes') in Part Two of Annex I to Regulation (EEC) No 2658/87. Those provisions have been amended by Commission Delegated Regulation (EU) 2022/887 <sup>(5)</sup>. Delegated Regulation (EU) 2022/887 clarifies the applicable codes by adding missing codes and removing codes which are no longer relevant. It is therefore appropriate to add the headings and CN codes 0901, 1902 19, 1904 10 30, 1904 10 90, 1904 20, 1904 90 80, 2008 99, 2906, 2936 and 3002 49 00 in the lists in the Annex to Implementing Regulation (EU) 2021/632 in order to avoid any ambiguity as regards which consignments of goods are subject to official controls at border control posts.

- (3) Commission Implementing Regulation (EU) 2021/1832 <sup>(6)</sup> introduced modifications in CN codes and descriptions of goods, including animal by-products. Implementing Regulation (EU) 2021/632 should reflect those modifications.
- (4) Implementing Regulation (EU) 2021/632 should therefore be amended accordingly.
- (5) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

ANNEX

ANNEX

Notes:

**1. General remarks**

General remarks are added to certain Chapters to clarify, which animals or goods are covered in the relevant chapter. In addition, where necessary, reference is made to specific requirements laid down in Commission Regulation (EU) No 142/2011 <sup>(1)</sup>.

The list of composite products that meet specific conditions and are exempted from official controls at border control posts are laid down in Commission Delegated Regulation (EU) 2021/630 <sup>(2)</sup>.

**2. Note to Chapter**

The lists in this Annex are structured in Chapters which correspond to the relevant Chapters in the Combined Nomenclature (CN) as laid down in Annex I to Council Regulation (EEC) No 2658/87 <sup>(3)</sup>.

The Chapter notes are explanations that have been extracted, where necessary, from the Notes to the individual Chapters of the CN.

**3. Extract from the Explanatory Notes and the Classification Opinions of the Harmonized System**

Additional information on the different Chapters has been extracted, where necessary, from the Explanatory Notes and the Classification Opinions of the Harmonized System of the World Customs Organisation.

Tables:

**4. Column (1) — CN code**

This column indicates the CN code. The CN, established by Regulation (EEC) No 2658/87, is based on the International Convention on Harmonized Commodity Description and Coding System (HS) concluded in Brussels on 14 June 1983 and approved by Council Decision 87/369/EEC <sup>(4)</sup>. The CN reproduces the headings and subheadings of the HS to six digits, with only the seventh and eighth figures creating further subheadings which are specific to it.

<sup>(1)</sup> Commission Regulation (EU) No 142/2011 of 25 February 2011 implementing Regulation (EC) No 1069/2009 of the European Parliament and of the Council laying down health rules as regards animal by-products and derived products not intended for human consumption and implementing Council Directive 97/78/EC as regards certain samples and items exempt from veterinary checks at the border under that Directive (OJ L 54, 26.2.2011, p. 1).

<sup>(2)</sup> Commission Delegated Regulation (EU) 2021/630 of 16 February 2021 supplementing Regulation (EU) 2017/625 of the European Parliament and of the Council as regards certain categories of goods exempted from official controls at border control posts and amending Commission Decision 2007/275/EC (OJ L 132, 19.4.2021, p. 17).

<sup>(3)</sup> Council Regulation (EEC) No 2658/87 of 23 July 1987 on the tariff and statistical nomenclature and on the Common Customs Tariff (OJ L 256 7.9.1987, p. 1).

<sup>(4)</sup> Council Decision 87/369/EEC of 7 April 1987 concerning the conclusion of the International Convention on the Harmonized Commodity Description and Coding System and of the Protocol of Amendment thereto (OJ L 198, 20.7.1987, p. 1).

Where a four-digit code is used: Unless otherwise specified, all animals and goods prefixed with or covered by these four digits shall be submitted to official controls at border control posts. In most of these cases, the relevant CN codes included in the Traces system referred to in Article 133(4) of Regulation (EU) 2017/625 of the European Parliament and of the Council <sup>(5)</sup>, are broken down to six- or eight-digit codes.

Where only certain specified animals and goods under any four-, six- or eight-digit code are required to be submitted to official controls and no specific subdivision under this code exists in the CN, the code is marked “Ex”. In that case, the animals and goods covered by this Regulation are determined by the scope of the CN code and by that of the corresponding description in column (2) and the qualification and explanation in column (3).

#### 5. **Column (2) — Description**

The description of the animals and goods is as laid down in the description column of the CN.

Without prejudice to the rules for the interpretation of the CN, the wording for the description of the animals and goods in column (2) is considered to be of indicative value only, since the animals and goods covered by this Regulation are determined by CN codes.

#### 6. **Column (3) — Qualification and explanation**

This column gives details of the animals or goods covered. Further information on the animals or goods covered in the different Chapters of the CN can be found in the Explanatory Notes to the Combined Nomenclature of the European Union <sup>(6)</sup>.

Products derived from animal by-products covered by Regulation (EC) No 1069/2009 of the European Parliament and of the Council <sup>(7)</sup> and Regulation (EU) No 142/2011 are not specifically identified in Union law. Official controls shall be carried out on products that are partly processed but remain raw products to be further processed in an approved or registered establishment at destination. Official inspectors at border control posts shall assess and specify, when necessary, if a derived product is sufficiently processed to not require further official controls provided for in Union law.

The nests may be presented untreated, or they may have been cleaned to remove feathers, down, dust and other impurities in order to render them suitable for consumption. They are generally in the form of whitish strips or threads.

Salanganes’ nests have a high protein content and are used almost exclusively to make soups or other food preparations.

Heading 0410 excludes animal blood, edible or not, liquid or dried (heading 0511 or 3002).”

“Heading 1516 covers animal, vegetable or microbial fats and oils, which have undergone a specific chemical transformation of a kind mentioned below, but have not been further prepared.

The heading also covers similarly treated fractions of animal, vegetable or microbial fats and oils.

Hydrogenation, which is effected by bringing the products into contact with pure hydrogen at a suitable temperature and pressure in the presence of a catalyst (usually finely divided nickel), raises the melting points of fats and increases the consistency of oils by transforming unsaturated glycerides (e.g. of oleic, linoleic, etc. acids) into saturated glycerides of higher melting points (e.g. of palmitic, stearic, etc. acids).

Heading 1518 also covers inedible mixtures or preparations of animal, vegetable or microbial fats or oils or of fractions of different fats or oils of the Chapter, not elsewhere specified or included.

The heading also covers, *inter alia*, used deep-frying oil containing, for example, rape oil, soya-bean oil and a small quantity of animal fat, for use in the preparation of animal feeds.

The heading also includes hydrogenated, inter-esterified, re-esterified or elaidinised fats and oils or their fractions, where modification involves more than one fat or oil.”
