2200K - 2700K
Very Warm

3500K
Neutral

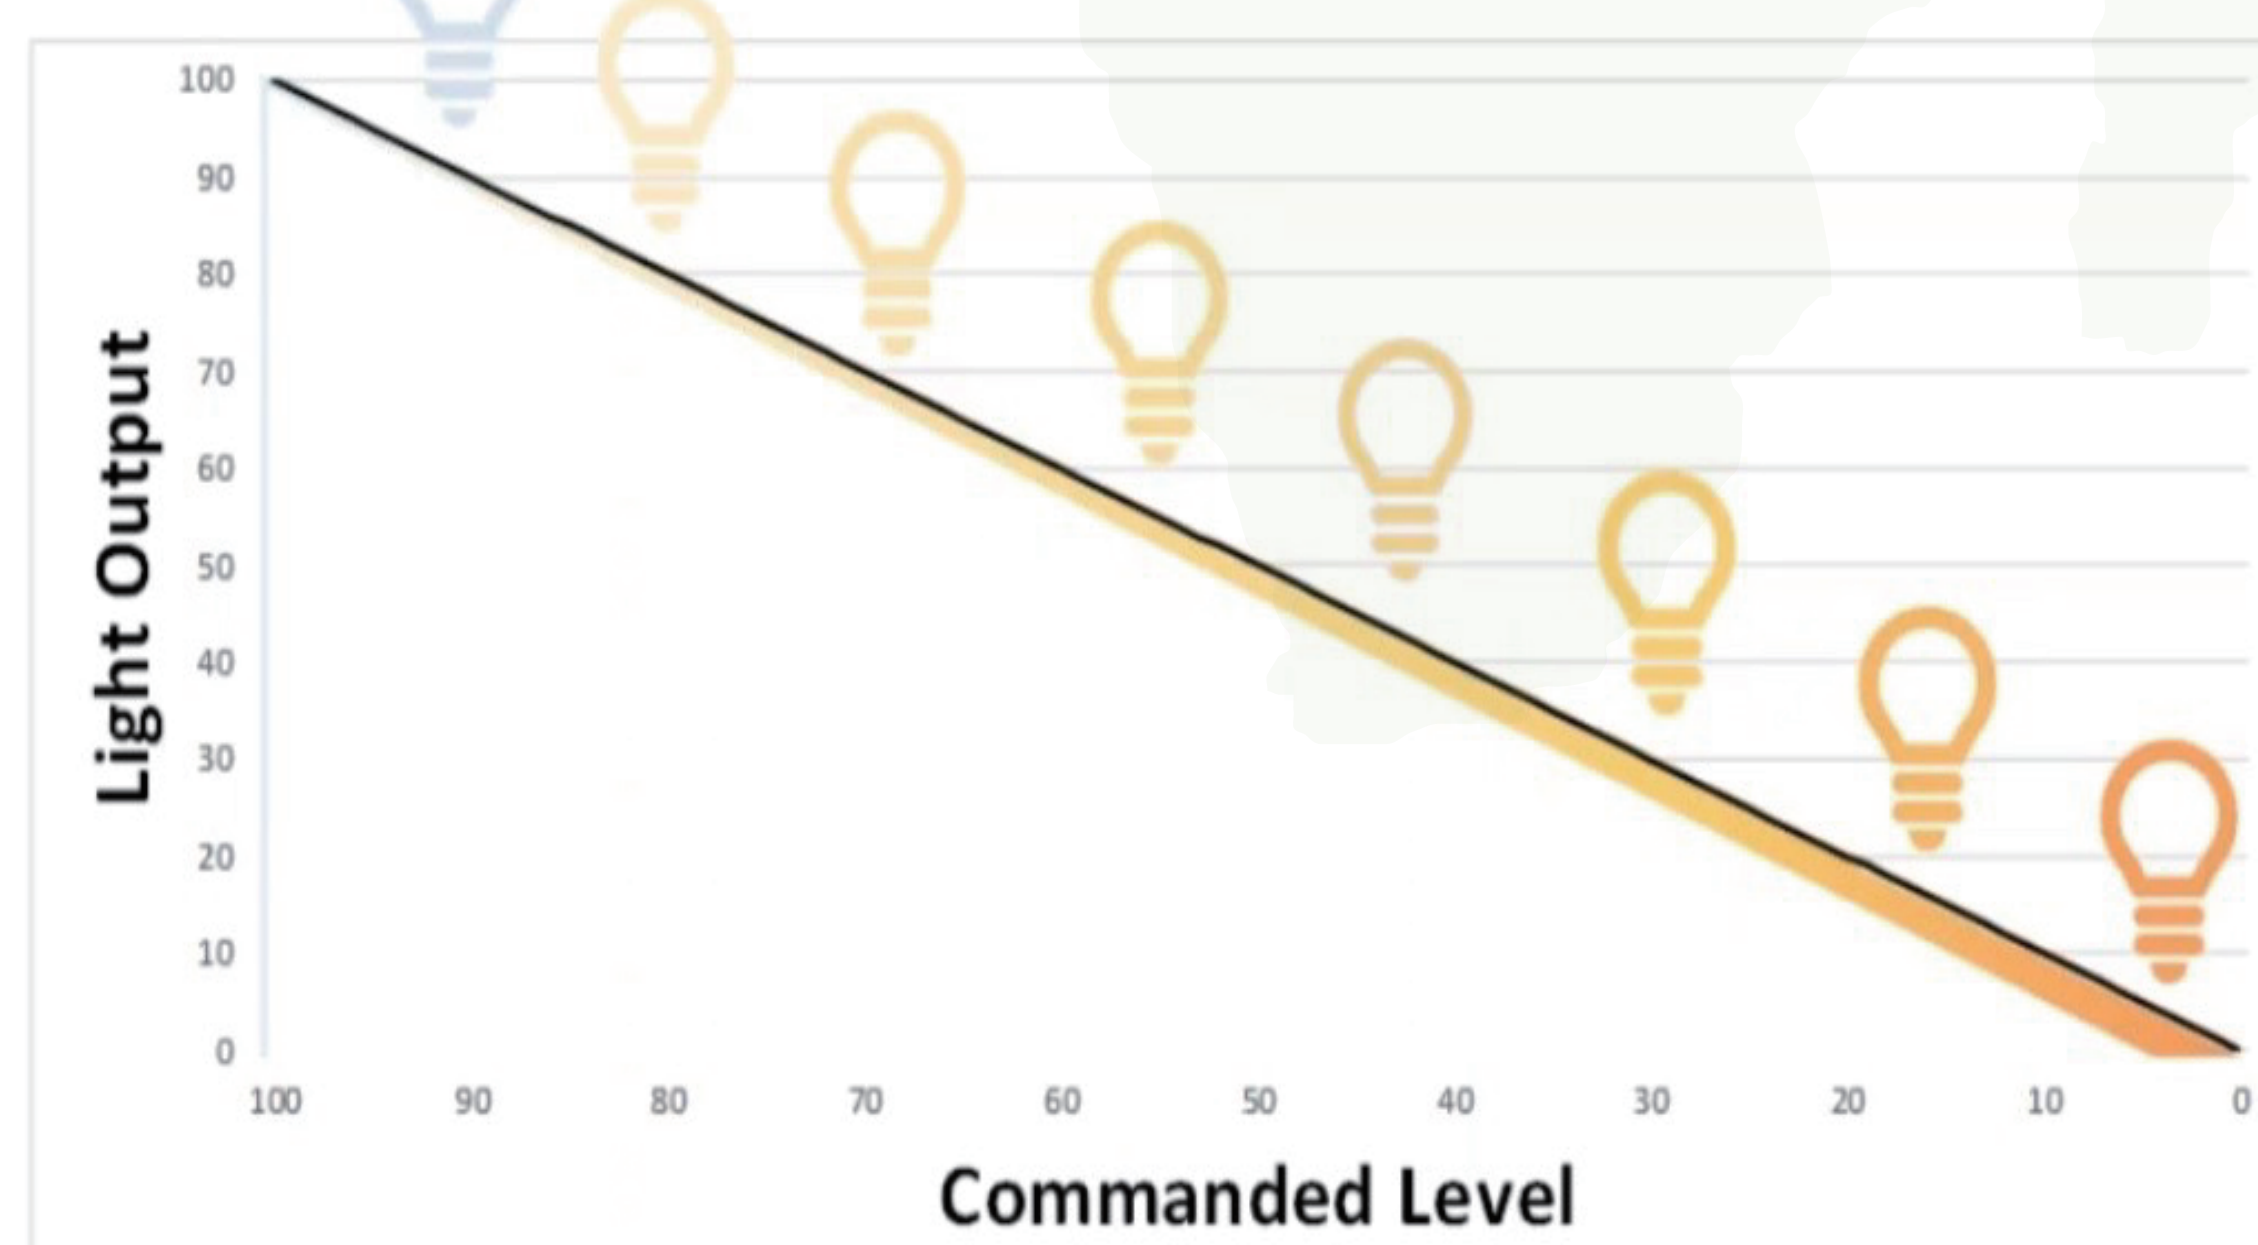

5500K - 6500K
Daylight

Red 1800K Warm 2700K - 3000K Cool 4100K
Incandescent Halogen

Warm Dimming

Warm dimming automatically changes the CCT of the light source as the intensity is changed.

No harsh cut off or abrupt switch off. This subtle effect is achieved to produce the most natural lighting experience
